

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the paragraph beginning at page 1, line 6, as follows:

The present invention relates to a portable and convenient to use mobile phone, ~~a mobile~~ terminal such as a PDA, a server that can transmit to and receive image data from the mobile terminal through a line, an image data transmitting/receiving system including the mobile phone terminal and the server, a program for activating a computer included in the mobile phone terminal or the server to function, and a recording medium for recording the program.

Specifically, the invention relates to an image data transmitting/receiving system that can transmit/receive and/or display symbol image data which are used in creating display images partly constituting specific graphic symbols such as map symbol images and icons, etc. to be arranged on an information display screen of the mobile phone terminal, a mobile phone and a server that are used in the image data transmitting/receiving system, a program for activating a computer included in the mobile phone terminal or the server to function, and a recording medium for recording the program.

Please amend the paragraph beginning at page 3, line 8, as follows:

Considering the aforementioned problems, the inventors have sought to create the present invention which provides for a technique for displaying images to optimum size, in accordance with the resolution capability of information image display screens of mobile phone terminals.

Page 3, after line 21, please add the following paragraph:

Hereafter, the mobile phone terminal is only described by the term of mobile terminal.
